

Wolf Gourmet® 10-Cup Programmable Coffee System

Superior-Tasting Coffee: Coffee lovers, this one's for you. The Wolf Gourmet programmable coffee system brews a superior-tasting cup thanks to advanced brewing technology that uses the optimal temperature and time during extraction. Once you choose your preferred brew strength and how many cups to brew, an integrated grounds scale and LCD screen will let you know exactly how much coffee to add. You can wake up every morning to hot coffee with a consistently smooth, balanced flavor.

Accu-Brew™ Technology: The coffee system offers five brew strength settings. Featuring an Accu-Brew™ setting, you always know exactly how much coffee to add depending on your taste preferences. An integrated scale weighs the grounds as you scoop or pour them for flawless brewing every time.

Satisfying Sips: A double-walled stainless steel carafe keeps coffee hot long after it's brewed. The carafe does not sit on a hot plate after brewing which allows it to maintain a fresh-brewed flavor all morning.

Additional Features: The Wolf Gourmet® Coffee System is equipped with a removable water reservoir and a front load brew basket situated within a smooth-glide drawer for easy use. Along with indicating amount of grounds needed, the LCD screen will keep you informed from preparing and pouring your coffee, to cleaning the machine with an automatic cleaning cycle. It even tracks when your coffee was brewed so you'll always know if its fresh before taking a sip.
